

Christophe Goasduff

Web Designer / Developer

Profile

I am an experienced web designer and developer. I am skilled in all aspects of web design, from writing W3C compliant XHTML and CSS code, optimising graphics and developing complex dynamic web applications, to creating and querying relational databases.

I have experience in developing and delivering complete projects from the initial meeting with the stakeholder to the scoping, design, development, testing phase and launching.

I am passionate about web technologies, usability in particular and, on a purely artistic level, graphic design.

I am motivated to continually develop my knowledge of web technologies. My freelance projects can be viewed on my website www.frogvision.co.uk

Professional Experience

2007 - present: Web designer/developer for the Scottish Court Service

Responsibilities:

- Designing and developing ASP.Net websites and web applications
- Maintaining and enhancing existing websites
- Acting as a consultant for the Director of IT, Head of Communication and Technical Analysts on web based projects
- Liaising and assisting third party contractors
- Maintaining web servers

Projects:
